

CUCC Website Strava College-Leaderboard

Use Guide

Cambridge University Cycling Club is trialling a new custom Strava Leaderboard on the CUCC Website, at cucc.co.uk/college-leaderboard.

- The leaderboard works using Strava's APIs, and as a result, a link to a reporting account is needed. This account is the friendly 'CUCC Bot'.
- The leaderboard sorts each college by **total ride distance**, but also has data on **elevation**, **elapsed time**, **distance per rider** etc. Just click on the college you'd like more info on.
- Data updates every 30 minutes, but this may take slightly longer to make it to the website (c.2hrs). Only **rides** count towards the total.
- The current phase is open to all CUCC members, and is being expanded to those outside of the club too. Follow the steps below to try it out!

1 Allow 'CUCC Bot' to follow you on Strava

Accept a follow request from the 'CUCC Bot' Strava account (strava.com/athletes/cuccbot). Follow 'CUCC Bot' and they will follow you back, or request to depending on your profile settings.

2 Join your College Club

Now join your College's 'CUCC Leaderboard' Club on Strava. You can either find the club via 'CUCC Bot's' profile, or using the table below:

Privacy

The only data collected from Strava and stored is your first name, surname initial, ride distance, elevation and duration - **no** GPS data is handled whatsoever. If you ever wish to opt-out of the leaderboard, simply block 'CUCC Bot' on Strava at any time.
